Printable Ring Sizer

Please note you **MUST PRINT** this chart (it will not work if you try to measure directly on screen). Prior to printing, please ensure the page size is set to 'Actual size' or '100%' in your print dialog box. Use a ruler to check that the ring sizer is exactly 10cm long on your printed page. This chart represents ring sizes for Australia. Sizing are approximations only and actual rings produced using these sizing methods may require adjustment at Temelli Jewellers at a later date.

Option 1:

Measure with the ring sizer
Place clear tape over the ring sizer to provide structural support & cut around the ring sizer outline. Cut a slit half way into the ring sizer where it is indicated by a dotted line, then insert the pointed end of the ring sizer into the slit - Make sure the letters are facing out, so you are able to see the size.
Place the ring sizer around the appropriate part of the finger (where you would normally wear the ring) and pull it gently so that it is wrapped around firmly on the finger.
Please note for the most accurate size, measure with warm hands and make sure the sizer is firm around the finger with no gaps.

Option 2: Measure a ring

Choose a ring that currently fits the finger comfortably. Place the ring on the page and move along the circles until the ring lines up perfectly with the inside of your ring. The approximate ring size is noted by the letter inside the circle that corresponds with your current ring size. If you are between two sizes choose the larger size,
